

Testimonial for Fullsun Marketing Pte Ltd

Fullsun was the supplier of sanitary wares for some of my major projects which are Khoo Teck Puat Hospital and upcoming office building project.

My working experience with the Fullsun team was a pleasant one; One thing I like about them was their knowledge of sanitary wares. Whenever we have any requests or enquiries on sanitary wares, they would always come up with solutions within a small period of time. Their team have in depth knowledge on sanitary products thus they could always provide useful and practical advices on what products should be used.

The other thing was their high quality products. They recommended sanitary products including water cisterns (WCs), basins and sensor taps and some special products like customized made stainless steel sink and safety grab bars in handicap and patient toilet, which were affordable and also high in quality. Furthermore, also fit the expectation of the owner. They always initiate meeting with us and introduced new catalogues to keep us up to date of their new products and allowed us to have more options to choose from.

In addition, when there were any installation issues on site, they would respond to it quickly by coming down to site area. They would make sure that the installation team understands the installation procedures and answer any question arose from them. Their services have been nothing but top notch.

Overall, I and my company are thankful for the services and professional advises that Fullsun team have provided for us. We look forward in working with them for our upcoming projects and more collaboration in the future.

Thank you.

Your sincerely
